

Environmental Management Procedure (EMP) 4.4.6.12 Tab 2

Subject: Priorities for Pest Management Operations

1. Purpose: This EMP establishes the Priorities for Pest Management Operations to safeguard the environment and human health from injury, disease, and exposure risks from pests and pesticides.
2. Document Control: This is a controlled document. Controlled documents are updated as required, reviewed at least annually, and re-dated if changed. Any documents to include blank forms appearing in paper form are not controlled and should be checked against the file version prior to use on the:

JBLE – Eustis Environmental website: <http://www.jble.af.mil/Units/Army/Eustis-Enviromental/>

3. References:
 - A. TCFE Regulation 200-6, Environmental Management
 - B. EMP Dictionary
 - C. EMP 4.4.6.12 Integrated Pest Management (IPM)
 - D. Integrated Pest Management Plan (IPMP)
4. Scope: This EMP applies to all Activities and personnel, including military, civilians, vendors, suppliers, and contractor personnel who enter JBLE-Eustis. The definition of an Activity can be found in JBLE I 32-101.
5. Roles and Responsibilities:
 - A. The Installation Pest Management Coordinator (IPMC) establishes pest management priorities.
 - B. The IPMC and the Pest Management Quality Assurance Evaluator (PMQAE) will ensure that pest management operations incorporate Integrated Pest Management (IPM) and maintain the priority of pest control standards. The IPMC and PMQAE will monitor and review all pest management records, reports, and work orders to adequately identify any trends that do not support the priorities of pest control.
 - B. DoD Pest Management Personnel, Pest Control Contractors, and all Pesticide Applicators will ensure that pest control priorities are strictly adhered to and the utilization of IPM is incorporated into each pest management operation.
 - C. All installation activities, facilities and contractors will ensure that pest control priorities are strictly adhered to and the utilization of IPM is incorporated into each pest management operation.
6. Procedures:
 - A. Priorities of pest control will be identified and incorporated into the IPMP and updated as appropriate.
 - B. Pest management personnel will accept work requests and prioritize them to replicate the priorities of pest control.
 - C. Priorities as articulated in the IPMP:

- (1) Disease vector arthropods.

- (2). Situations involving mammals posing as risks of rabies.
- (3). Venomous animals.
- (4). Bats and rodents in occupied or storage buildings
- (5). Mechanical disease transmitting pests.
- (6). Nuisance biting arthropods.
- (7). Poisonous plants/poison ivy.
- (8). Structurally-damaging pests.
- (9). Stored product pests.
- (10). Vegetation affecting security fencing and building perimeters.
- (11). Animal and plant pests affecting land sustainment.
- (12). Vegetation affecting rights-of-way.
- (13). Animal and plant pests affecting recreation.
- (14). Animal and plant pests affecting aesthetics.
